Satyajit Mall

DATA PLATFORM PRODUCT MANAGER | AI/ML INTEGRATION | GROWTH ARCHITECT

+918240128326 | satyajitmall01@gmail.com | linkedin.com/in/satyajit-mall/ | Bengaluru | India

Skills & Tools

Data & BI Platforms

BI & Visualization Tools

- **BigQuery**, **Metabase**, Google Looker Studio
- Tableau, Power BI

Product Analytics Platforms

- **GA4 & Firebase** (Ingestion Layer)
- Amplitude, Mixpanel

Core Data Languages

- **SQL & Database Management** (PostgreSQL)

Product Management & Strategy

Technical Product Strategy & Architecture

- Analytics Architecture Design & Integration
- Product MarComm & Automation Architecture
- Data Modeling & Taxonomy (MarTech/CDP Focus)
- ETL/ELT Data Ingestion Framework Design
- API & Scalability Roadmapping
- Solution Architecture & System Design

Product & Project Tools

- Jira, Productboard, Confluence
- Trello, Asana, Basecamp
- Miro, Figma

Core Skills

- Product Strategy & Roadmap
- Product Lifecycle Management
- MVP & Feature Prioritization
- UX/UI Design, Lean Product Development

Customer Engagement & MarTech Automation

Workflow & Integration (Low-Code)

- **N8n**, **Zapier**, Make (Integromat)

CRM & Communication Platforms

- HubSpot, ActiveCampaign, Adobe Marketo Engage
- Pardot, Netcore, Clevertap, Mailchimp, Instantly
- Braze, Intercom (In-App/Multi-Channel Messaging)

Methodologies & Leadership

Methodologies & Tools

- **Agile/Scrum (CSPO)**
- Django & Strapi (Frameworks)

Project & Leadership

- Strategic Stakeholder Management
- Cross-functional Collaboration

Certifications

- **Certified Scrum Product Owner (CSPO)**
- Six Sigma Green Belt
- Google Analytics & Ads
- Advance Excel, SEO by Udemy
- Product Management - LinkedIn

Education

PGDM MARKETING
PUNE INSTITUTE OF BUSINESS MANAGEMENT
Major: Marketing | Minors: Retail Marketing, Market Research
CGPA: 8.21

BTECH
DR SUDHIR CHANDRA SUR DEGREE ENGINEERING COLLEGE MAKAUT
Automobile Engineering Program
CGPA: 7.8

Professional Summary

A Growth-Focused Product Manager with 4.5+ years of experience specializing in driving product-led growth through strategic system architecture and **AI-powered automation**. My core expertise is **MarTech transformation** and solving the problem of **fragmented data and operational silos** by designing and implementing unified data strategies and enterprise automation layers that connect various core functional domains (marketing, sales, operations, and product) across any organization. I excel at 0→1 product launches (Mobile, SaaS) and deploying intelligent self-service solutions that handle high transactional volume (justifying the approach by **reducing support costs by 25%**). This results-driven focus delivered proven business impact, including generating **>₹20 Cr in revenue** from a new mobile app, achieving a **20% increase in overall ROAS** via proprietary attribution, and accelerating time-to-market for personalized communication by up to 40%.

Professional Experience

Miles Education
Dec 2023 – Present

Product Manager | Product Growth and Marketing

- Spearheaded the 0→1 launch of the Miles One mobile app, navigating the critical challenge of translating qualitative user research from 100+ interviews into an actionable product roadmap. By architecting a dual-purpose MVP that served both lead generation and nurturing, I achieved the onboarding of 40K+ learners and generated >₹20 Cr in revenue, while reducing early churn by 10% via a segment-based onboarding flow.
- Architected and productized the Miles One Agentic Assistant, establishing a Goal-Oriented Agent Framework managed via an n8n Orchestration Layer. This system utilizes a Function-Calling pattern to dynamically invoke specialized backend API tools for transactional fulfillment (e.g., booking webinars, creating enquiries, retrieving personalized LMS progress). This architecture leverages a RAG (Retrieval-Augmented Generation) strategy for context and Memory Retrieval for personalization, driving a 25% increase in automated self-service transactions.
- Strategically identified and captured an untapped market by leading the 0→1 development of the Miles Masterclass. This bite-sized, subscription-based product leveraged user behavior insights from platforms like Udemy and MasterClass to deliver flexible, 45-minute video modules. The B2B go-to-market strategy successfully onboarded 30,000+ users and secured 2,000+ paid subscriptions, contributing to a 15% increase in lead conversion for the core CPA program and a 25% rise in content engagement across public channels.
- Architected a unified data ingestion pipeline for both Miles One and Masterclass by implementing GA4/Firebase. Exported cross-product behavioral data to BigQuery and utilized BigQuery ML to develop predictive models for churn and conversion likelihood. This intelligence informed LTV optimization through hyper-targeted ad/communication strategies, resulting in a 15% boost in Day 7 activation and 25% increase in key event growth.
- Led the development of Miles Force (Internal CRM module), focusing on optimizing the critical lead management flow from Enquiry to SPOC Allocation. This module integrated the Source Detection & Tagging module (from Miles Engage) and implemented a Sales Queue Module designed for effective, day-level lead distribution to optimize calling effort, significantly boosting sales efficiency and data accuracy.
- Engineered an Agentic Reporting Platform (0→1) that transcended traditional BI by integrating an RAG-based AI analysis layer with a core data warehouse. I designed the ETL/ELT pipeline using N8n and PostgreSQL to unify leads, in-app behavioral data (key events), and CRM performance metrics, providing management with real-time, substantive analysis and direct insights via a dual-interface (dashboard + agent) that significantly reduced reliance on manual reporting.
- Solved for ROAS Accuracy & Attribution: Led the 0→1 development and launch of Miles Engage (Internal SaaS), a proprietary data platform architected for end-to-end attribution. The system implemented campaign-level tracking across all channels and integrated deeply with the CRM to monitor lead progression. The core innovation was a proprietary, compounded attribution model, powered by N8n automation (for critical data sync across marketing, CRM, and analytics). This combined data hub drove a 20% increase in overall ROAS and significantly boosted lead quality, while reducing ops workload by 30% and improving cross-functional visibility by 25%.
- Spearheaded the MarTech & Communication Architecture by governing the CDP implementation and event taxonomy across the full product ecosystem (Apps, Websites, CRM, LMS). Orchestrated complex multi-state behavioral flows by integrating and managing core communication platforms (Netcore, Clevertap, Watti) via a dedicated n8n/Zapier ETL/Orchestration layer, ensuring real-time personalization and a 40% reduction in campaign time-to-market.
- Architected a high-velocity Agentic Tool (SuperBot AI Voice Assistant) for sales and lead qualification. The system utilized a RAG-like pattern leveraging lead data stored in PostgreSQL, powered by N8n-driven data integration (ingestion/export) for real-time memory retrieval. This infrastructure slashed sales analysis time by 80%, boosted qualified leads by 15%, and cut the sales cycle by 5%.
- Productized a multi-platform calendar booking microservice (CRM-based) for Community Engagement, enabling candidates to schedule connects with alumni panelists and office visits. This drove a 30% increase in post-course engagement, achieved a 12% lift in community-led acquisition, and increased base conversion by 8%.
- Developed an Internal SaaS 'Webinar & Instant Content Microservice', integrated with Zoom and our CRM, that served as a custom web page builder for content teams. This scalability solution led to a 40% increase in overall webinar frequency and a 20% increase in base conversion due to improved cross-platform deployment.
- Contributed to the 0→1 development of an LMS for 40,000 users, and deployed a specialized Customer Data Platform (CDP) to manage learner data taxonomy and power a personalized notification network that increased learner engagement by 15% and course completion by 10%.

Almabetter
Nov 2022 – Oct 2023

Associate Program Manager | Product Lead Growth and Strategy

- Redesigned dev workflows using JIRA and Basecamp to resolve sprint velocity misalignments, reducing errors by 80% and accelerating content readiness by 7 weeks.
- Designed and shipped a productized ticketing system to address user content access issues, cutting resolution time by 35% and boosting product-related CSAT from 7.08 to 9.1.
- Architected the Communication Framework and MarTech stack by standardizing the event tracking and data taxonomy across all platforms (Websites, CRM, LMS). Managed the data unification and workflow orchestration via a dedicated n8n/Zapier ELT layer to enable real-time, personalized drip campaigns, boosting lead nurturing efficiency by 30% and reducing operational latency.
- Identified a market opportunity and orchestrated the Go-to-Market strategy for the Events Vertical product, driving 20% QoQ revenue growth by increasing online event enrollments by 60% and attendance by 40% via strategic product positioning.
- Optimized product acquisition costs through deep analytics and targeting, reducing spend across WhatsApp (20%), marketing comms (15%), and event marketing (15%). This improved qualified lead flow by 40% more qualified leads and a 15% increase in product conversion.
- Developed communication frameworks & sales collateral to tackle slow lead conversion, driving 20% MoM qualified lead growth and shortening sales cycles by 10%.

Upgrad
Jan 2021 – Oct 2022

Sr Associate | Program and Content Development

- Addressed learner engagement challenges via behavioral data analysis, informing new learning strategies that improved course completion rates by 10% and learner success metrics by 12%.
- Defined and executed content development roadmaps for 5+ post-graduate programs, directly contributing to program quality and learner outcomes.
- Conducted market analysis to identify program gaps, leading to the design and launch of 3 new PG & BBA-MBA programs addressing unmet learner needs.
